EPIMAT

The Personal Protective Equipment (PPE) Dispensing Machine

REDUCE YOUR PPE CONSUMPTION

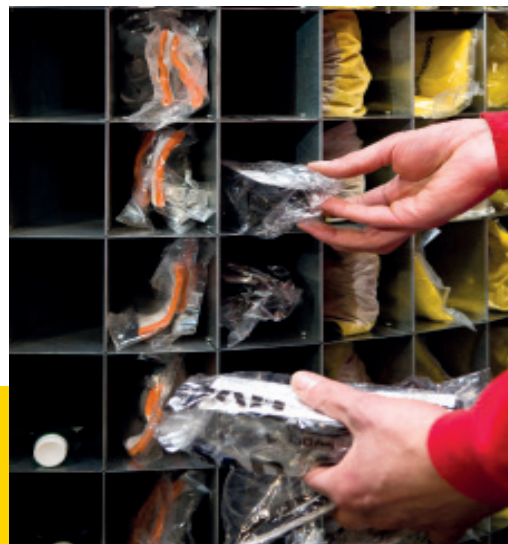

Choose an ECO-logic and economic distribution for your PPEs. Use EPIMAT to reduce your consumption considerably and optimize your team leaders' work time.

- Centralised database with real time consumption analysis.
- Product access control for each group of employees.
- Spare quantities available.
- Financial values.
- Machine fill rate.

PPES AVAILABLE ROUND THE CLOCK

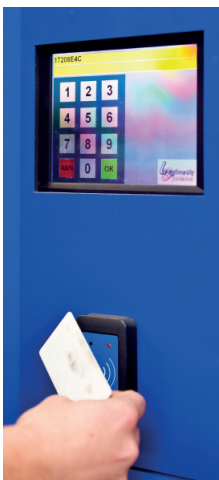

European Directive 89/656/EEC stipulates that companies must provide their employees with the PPEs they require, at no charge and individually, as well as supervise their effective use. EPIMAT ensures such availability 7 days a week, 24 hours a day, thus guaranteeing use of this equipment by employees.

- Available on the worksite, the PPE dispensing machine is equipped with a touch screen, featuring the information required to help employees choose the right PPE: technical datasheets, instructions for use, job descriptions, recommendations, etc.
- The PPE dispensing machine helps ensure compliance with the recommendations validated by the prevention department.
- Use the company's access or clock-in/out card.
- Dispensed product stock-out warning.
- Products selected according to professional access rights per workstation.
- Lockers can be provided to store the catalogue products ordered by employees via the touch screen..

EASY TO USE

The machine is compatible with all types of access controls and badges: contactless cards (RFID), magnetic cards, barcode cards.

1. The user selects the relevant PPE.
2. He swipes his badge in the reader. The software records: the dispensing time and date, the user's ID number and the product dispensed.

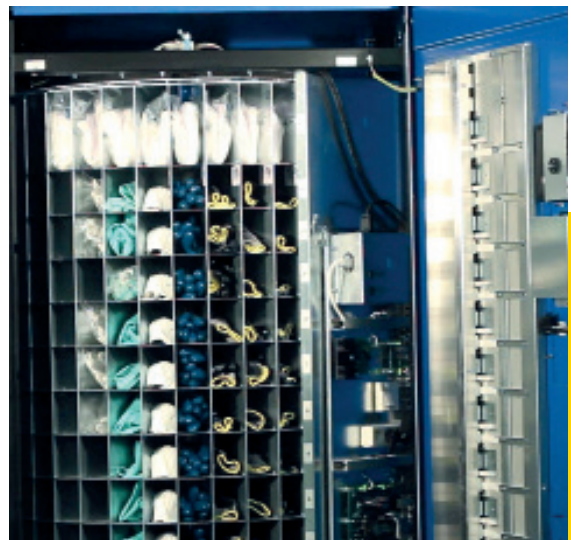

3. Optionally, reading of the technical datasheet can be acknowledged prior to dispensing.

4. The dispensing machine then dispenses the product by opening the relevant compartment.

The PPE dispensing machine is designed to suit as many requirements as possible:

- Possibility of managing 1 to 500 different item references.
- A capacity of 36 or 2500 items, as per configuration.
- A number of locker formats, from type 1 to 6 as standard, with optional combining of locker types on the same machine.

TOOLMAT

The cutting tool and industrial consumable dispensing machine

REDUCE CONSUMPTION AND OPTIMISE STOCK

Do you find your tool consumption hard to quantify? Our Toolmat dispensing machine will make your task easier!

- Centralised database with consumption analysis:
 - Spare quantities;
 - Financial values;
 - Machine fill rates;
 - Complete statistics for your production costs.
- Reduction in indirect labour costs.
- Minimised stock with better turnover.
- Monitoring of tool distribution and return.
- Optional automatic lockers.

NO MORE RISK OF HAVING TO STOP PRODUCTION

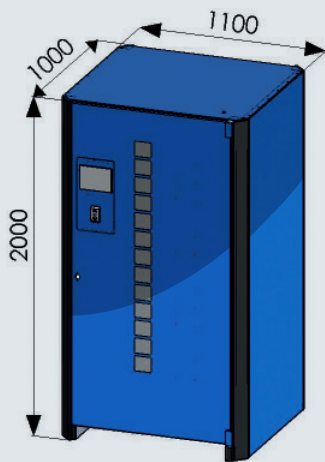

The dispensing machine operates 7 days a week, 24 hours a day, thus guaranteeing 100% safe storage of your tools.

- Automatic replenishment.
- Rapid machine filling.
- Real time stock inventory.
- Use of the company's access or clock-in/out badge.
- Dispensed product stock-out warning.
- Products selected according to professional access rights per workstation.

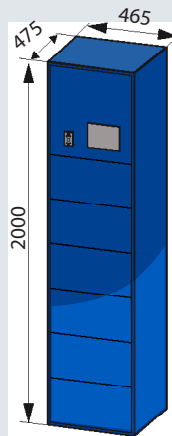

TECHNICAL DETAILS

MACHINE

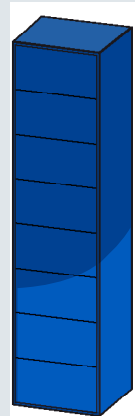

Technical data:
 Weight: 430 kg
 Power: 150 W
 Supply: 110/230 V AC

AUTOMATIC LOCKERS

Column 1
 6 lockers
 20 x 47.5 cm
 with screen and
 badge reader

Column 2
 8 lockers
 20 x 47.5 cm

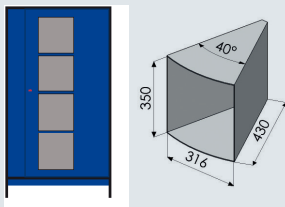

Column 3
 16 lockers
 12 x 47.5 cm

CONFIGURATION TYPES

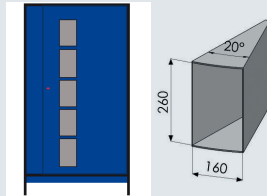

TYPE 1

36 lockers
 32 x 35 cm

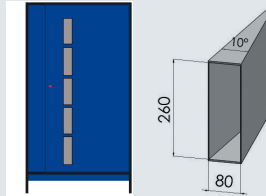

TYPE 2

90 lockers
 16 x 26 cm

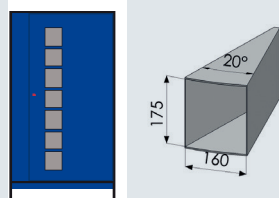

TYPE 3

180 lockers
 8 x 26 cm

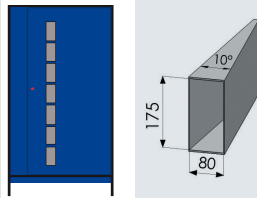

TYPE 4

126 lockers
 16 x 17.5 cm

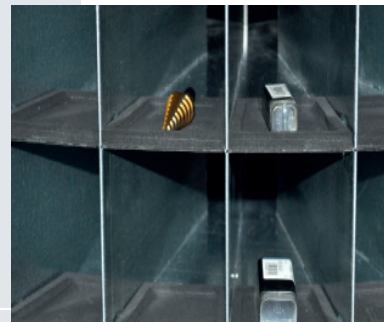

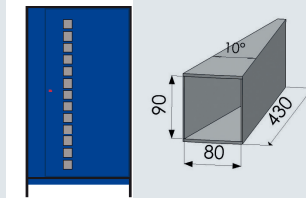

TYPE 5

252 lockers
 8 x 17.5 cm

TYPE 6

468 lockers
 8 x 8 cm

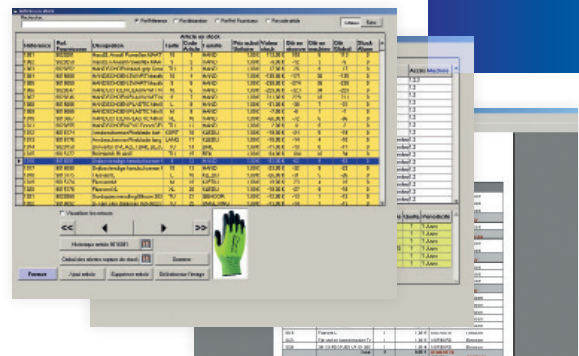

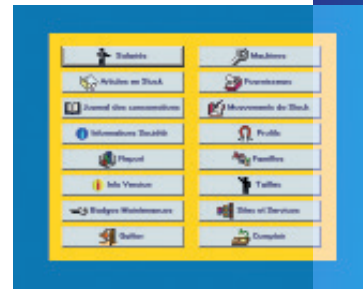

EVERYDAY SIMPLIFIED MANAGEMENT

AN EFFICIENT MANAGEMENT SOFTWARE

All our machines are equipped with a functional management software package. Installed on one or more of your computers, it allows network management of your entire installed machine base. This software is both easy and intuitive to use, and offers you a large variety of functions:

- Dispensed product stock-out warning and restocking.
- Definition of access rights, standard profiles per employee, and required quotas.
- Real time stock overview.
- Consumption history.
- Print-out of items to be replenished.
- Consumption report, Excel export.
- Automatic link with your ERP, consumption export, integration of employee inputs-outputs, allocation change.

SIMPLIFIED INSTALLATION

A combination of 3G and Cloud simplifies machine administration.

- Secured access to the machine with no need to use the corporate network.
- Online data management.
- Remote servicing by our technicians.
- The machine remains operational should the GSM network fail.

AN INNOVATIVE, RELIABLE AND SUSTAINABLE

R&D AT THE HEART OF THE COMPANY

We develop products that adapt to your changing needs

- Engineers integrate the new technologies, and adapt or create new systems at our customers' request.

MAINTENANCE THROUGHOUT FRANCE

An express service thanks to our partner's national network.

BEFORE SALES

Guarantee you a machine suited to your needs

A quantitative study of your current consumption

- Advice as to the type of lockers to be installed.

AFTER SALES

Build a lasting relationship

Our acknowledged expertise on the market over the past 15 years guarantees the smooth running of our machines and the reliability of our department.

- Training in the management software.
- Remote maintenance via the GSM.
- Integration of employee and product data.
- Turnkey: machine start-up immediately on installation on site.
- Equipment guaranteed throughout the duration of the contract.
- Hot-line.
- Our expert partner technicians provide troubleshooting throughout France.
